

SFPUC 2026-05-22-v01 QC Report

Input Inventory

- Source file: `data-raw/sfpuc/2026-05-22_v01/2026-05-22_v01.gpkg`
- Source layer: `merged`
- Feature count: 2
- Geometry type: Multi Polygon
- CRS: NAD83(2011) / California zone 3 (ftUS)
- Field count: 29

Output

- Target profile: `RestorationProjectSubmission`
- Output file: `data-standardized/sfpuc/2026-05-22-v01.gpkg`
- Output layer: `restoration_projects`
- Output feature count: 2
- Output CRS: `EPSG:3310`
- Program/system fields omitted from output: `project_id`, `update_date`
- Source helper fields omitted from output: `geometry`

Transformations

- Used the submitted `merged` layer; the `GeoPackage` also contains `tuolumne_hrl_restoration_spatial_data__merged` with matching feature count and fields.
- `project_id` and `update_date`: omitted as program-assigned canonical-record fields.
- Source helper field `geometry` is an attribute column with missing values and is omitted; the active spatial geometry is preserved from `geom`.
- `project_name`: repaired apparent field-width truncation.
 - `Upstream of Old LaGrange Bridge Restoration Project` -> `Upstream of Old LaGrange Bridge Restoration Project`
- `lead_entity`: corrected apparent organization-name typo and normalized semicolon serialization.
 - `San Francisco Public Utilites Commission` -> `San Francisco Public Utilities Commission`
- `funding_sources`: converted comma-delimited acronyms to semicolon-delimited values and corrected apparent SFPUC typo.
 - `SFPUC, MID, TID, CDFW` -> `SFPUC; MID; TID; CDFW`
 - `SPFUC, MID, TID` -> `SFPUC; MID; TID`
- `project_stage`, `project_type`, `contractors`, and `target_species`: normalized semicolon-delimited serialization.
- `early_implementation`: wrote logical values required by the schema.
- `estimated_budget`, `funding_secured`, `funding_gap`, and `construction years`: wrote integer values required by the schema.
- Text length limits from the pinned schema were checked and enforced for description and comment fields.

- Submitted acreage values are preserved rather than replaced with geometry-derived acreage.
- Missing `acreage_fish_food` values are retained as missing for now by local review decision.
- Geometry was transformed from NAD83(2011) / California zone 3 (ftUS) to EPSG:3310 and Z/M ordinates were dropped.

Validation Summary

- Errors: 0
- Warnings: 5
- Informational notes: 6

Remaining Review Items

- No remaining review items documented.

Validation Details

See [reports/sfpuc/2026-05-22-v01_validation.csv](#) for row-level validation details.
