

DWR 2026-06-19-v01 QC Report

Input Inventory

- Source file: `data-raw/dwr/2026-06-19_v01/2026-06-19_v01.gpkg`
- Source layer: `restoration_projects`
- Feature count: 13
- Geometry type: Multi Polygon
- CRS: NAD83 / California Albers
- Field count: 25

Output

- Target profile: `RestorationProjectSubmission`
- Output file: `data-standardized/dwr/2026-06-19-v01.gpkg`
- Output layer: `restoration_projects`
- Output feature count: 13
- Output CRS: `EPSG:3310`
- Program/system fields omitted from output: `project_id`, `update_date`

Transformations

- `project_id` and `update_date`: omitted as program-assigned canonical-record fields.
- Source did not include `funding_gap`; where `estimated_budget` and `funding_secured` were both submitted, `funding_gap` was derived as `estimated_budget - funding_secured`.
- `funding_sources`, `project_stage`, `project_type`, `contractors`, `lead_entity`, and `target_species`: normalized semicolon-delimited serialization.
- `funding_sources`: dropped empty submitted list elements.
 - `Prop 68; CVPIA; ; DWR -> Prop 68; CVPIA; DWR`
- `Dos Rios Norte lead_entity`: corrected from `DWR` to `River Partners` based on program direction.
- `estimated_budget`, `funding_secured`, `funding_gap`, and construction years: wrote integer values required by the schema.
- Text length limits from the pinned schema were checked and enforced for description and comment fields.
- Submitted acreage values are preserved rather than replaced with geometry-derived acreage.
- Geometry was transformed from NAD83 / California Albers to EPSG:3310 and Z/M ordinates were dropped.

Validation Summary

- Errors: 13
- Warnings: 1
- Informational notes: 6

Remaining Review Items

- Eleven records are missing required `funding_secured`; supply funding-secured values or confirm the schema should allow missing values for this submission.
- Dos Rios Norte is missing required `construction_start_year`, `construction_completion_year`, and `funding_secured`; supply those values before the record can pass validation.

Validation Details

See `reports/dwr/2026-06-19-v01_validation.csv` for row-level validation details.
